

Draft Workplan

Waddie Assal Jeroen Rooijmans Jasper Timmer
Maarten de Waard Maarten Inja

June 8, 2011

1 Specification

2 Functionial Design

3 Different Components and Test

4 Deliverables

4.1 Milestones

This subsection will describe the milestones, and what deliverables we will provide.

4.1.1 Milestone #1

A list of deliverables:

Drive around: We want the program to be able to direct the robot through the environment. We will not yet focus on the ability to follow lines or walls.

Avoid collision: The robot should be able to avoid collision with objects and walls. It will stop, turn a random corner, and drive on. This way it will cover most of the area without colliding.

Classes needed to be implemented for this:

- Coördinator

- Sensor
- Reflexes
- Motor

4.1.2 Milestone #2

A list of deliverables:

Avoid obstacles The robot will be able to avoid the obstacles that cross his path, in stead of stopping
